Cable-Mgr.
Cable Trays By Wiremaid™

Quality Innovators Since 1950

The Safest Solution™

Only CABLE-MGR.® by Wiremaid™ offers a complete line of factory pre-fabricated UL Classified® turns and junctions for a 100% UL Classified® and NEC Compliant Wire Basket Cable Tray System.

U.S. Patent No. 7,546,987

About Wiremaid U.S.A.

Since 1950, Wiremaid™ has designed and fabricated metal and wire products for commerce and industry. Wiremaid is a leader and innovator in the design and manufacture of safety and protective wire cable trays, guards for lighting fixtures, fans, and equipment manufactured using Eco-Friendly recyclable materials.

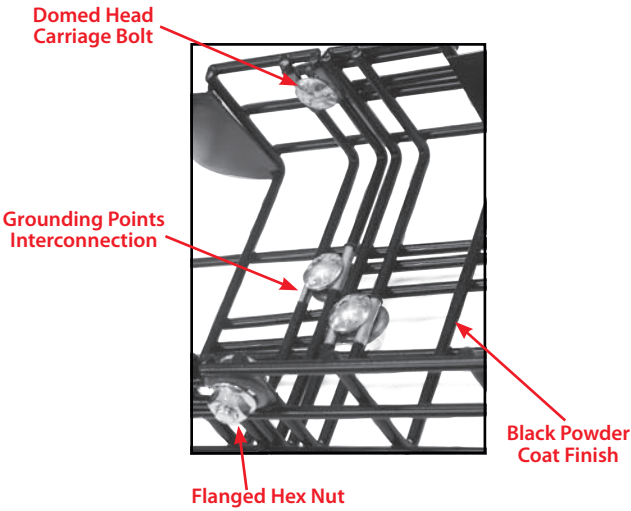

Our innovative products are designed for ease of installation. Dedicated to service and excellence in workmanship, Wiremaid continually strives to be at the vanguard of its industry.

CABLE-MGR.® PRO-10™ is an award-winning wire cable tray system made by the Wiremaid Division of Vutec Corporation. Only PRO-10™ has NEC 392.5 (E) compliant fittings for changes in direction with full UL Classification® as equipment ground conductor. It's patented one-tool system saves money and installation time.

The One-Tool System™

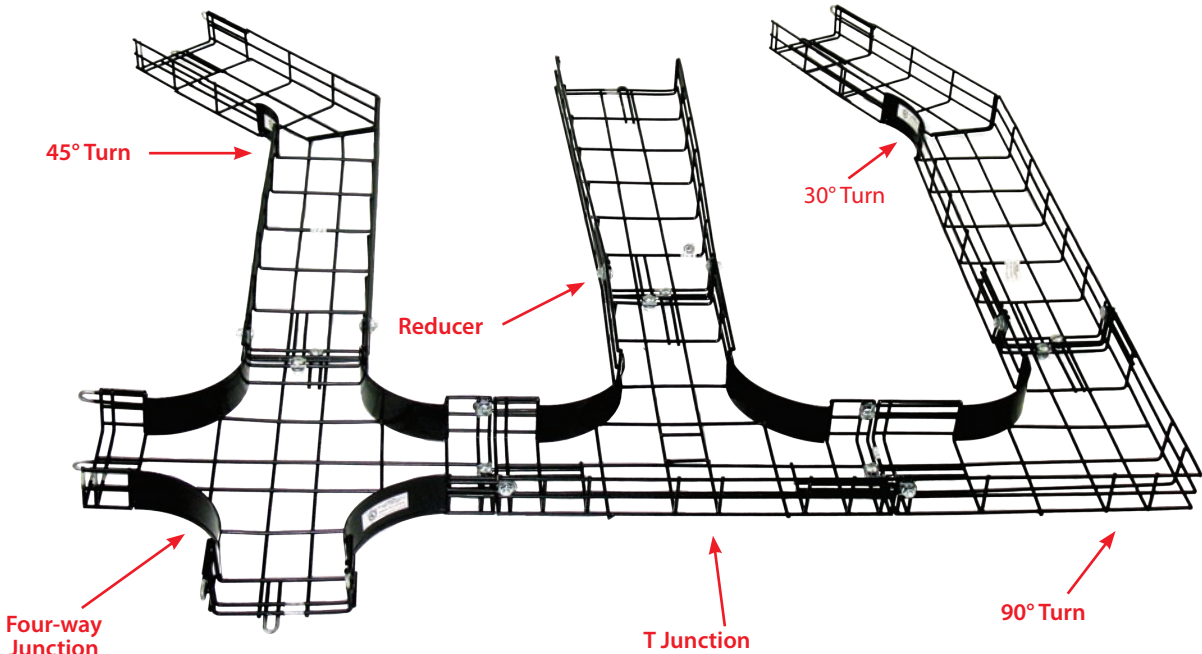

PRO-10™ Maintains UL® Classification

- PRO-10™ is the safest solution
- Requires NO bending or cutting; factory-made "4-way", "T", 90°, 45°, 30° horizontal and elevation changes
- Compliant to the National Electric Code 392, UL Classified®
- Acts as a equipment ground conductor (NEC 392.7); no bonding jumpers required
- Adapts to difficult architectural designs to accommodate changes in direction and elevation of cable runs
- Reduces installation time up to 50% with the patented "one-tool system™"
- Provides strength, rigidity without additional hardware; has smooth edges
- Manufactured with protective powder coated colored finishes avoiding corrosion and Zinc Whiskers. Standard colors - Black/Chrome, also available at no charge in an array of other colors.
- Featured in light or heavy duty product styles
- All support hardware available
- Powder coating is standard finish
- Custom sizes available
- Eco-Friendly, manufactured using 95% recycled materials
- U.S. Patent No. 7,546,987

Typical PRO-10™ Cable Tray Layout

Wiremaid Products Division has developed a unique cable tray system that is compliant to the National Electric Code requirement (NEC 392) for bonding and grounding. PRO-10's* unique design provides bonding between adjacent trays without the necessity of bonding jumpers or additional hardware. Accomplish the most complex design installation with UL Classified® CABLE-MGR.® PRO-10™ Series.

PRO-10™ provides strength, rigidity, and corrosion protection with standard powder coatings in conjunction with an array of finishes and colors that eliminate Zinc Whiskers.
